

Friends of Browns Canyon

Friends of Browns Canyon (FOBC) is a non-profit 501(c)(3) membership organization dedicated to protecting, conserving and enhancing the ecological and natural resources of the Browns Canyon area. FOBC serves its members, local community and national constituents by providing educational opportunities about the benefits of the diverse natural landmarks and ecosystems of Browns Canyon. Acting as the voice of the Browns Canyon area, including the National Monument, we inventory and study the ecological and natural needs of the area and present them to local community members, governmental agencies and national organizations. We believe the Browns Canyon area holds treasures and values for ages to come. We believe providing education of these treasures and values to be a key element in the preservation of Browns Canyon.

Our Mission

Friends of Browns Canyon (FOBC) works to preserve and support conservation of Browns Canyon National Monument and the surrounding areas. We work to provide and facilitate a unified voice for those concerned about protection and conservation of Browns Canyon, and to provide educational opportunities for, and to engage the public in conservation efforts. We are committed to working with Federal and State agencies on management and development issues affecting the area and to actively seek those opportunities and means that will improve the abilities and effectiveness of the Friends of Browns Canyon.

FOBC Activities

- Friends of Browns Canyon's (FOBC) efforts and activities include monitoring conditions and resources in Browns Canyon National Monument (BCNM). This in turn facilitates and nurtures awareness of the natural, cultural, historic, and geological qualities and the scenic views found in the Monument.

- FOBC works with Browns Canyon National Monument management agencies, as well as other interest groups, in the development of a management plan for the new national monument.
- FOBC seeks to develop new partnership opportunities as well as add new members to enhance effectiveness and membership.
- FOBC's activities include outings, events and presentations that inform and provide educational opportunities for the public and increase public involvement in the Monument.
- FOBC is committed to the long-term stewardship and conservation of BCNM, which includes active and engaged involvement in current and future Monument management plans.
- FOBC annually hosts hikes and work projects to provide opportunities for recreation in and protection of the natural resources in BCNM. FOBC often partners with other local organizations for these projects, creating a diverse, grassroots-based coalition.
